

Marine and Tropical Coastal Ecosystems

WHALES, SEA TURTLES, AND REEFS

Travel to Thailand to study marine ecology!

This exciting course offers 4 weeks of hands-on learning in marine conservation. Study Bryde's whales, sea turtles, and vibrant coral reefs as you explore the Gulf of Thailand's underwater world. Earn your PADI Open Water and Advanced SCUBA certifications while conducting extensive hands-on research and contributing to marine conservation efforts. Perfect for students passionate about the ocean, environmental science, and marine biology. Don't miss this once-in-a-lifetime journey!
