

SUMMER PROGRAM

Elephants & Conservation Ecology

THAILAND AND LAOS

Travel to Thailand and Laos to study elephant conservation this summer!

Join us for an unforgettable adventure in Thailand and Laos! This hands-on experience immerses students in Asian elephant conservation through fieldwork and research in wildlife sanctuaries, elephant conservation centers, and study in Chiang Mai, Thailand and Luang Prabang, Laos. Work directly with elephants, study their health, re-wilding efforts, and the role they play in Southeast Asian ecosystems and cultures. Open to any major, this program is perfect for students in ecology, veterinary science, wildlife biology, and related fields.
